sgapiGetTitle(%%questionID,%%language)

This function returns the title of a question.

Using the %%language parameter you can return the title in the given language. The values are the languages available in the translation menu. %%language must be title case.

Example

In the below example we output the spanish question title for question ID 2.

```
%%question = 2;
%%language = "Spanish";

%%output .= sgapiGetTitle(%%question, %%language);
```
