sgapiDisqualify(%%message)

This function disqualifies the user and ends the survey. %%message will display your customized message to the respondent.

Example

In this example, if the answer to question ID 2 is "no" and there are fewer than 3 answered questions on page ID 1, then the respondent is disqualified.

Check it out in an Example Survey

```
%%question1 = sgapiGetValue(2);
%%numberAnswered = sgapiQuestionsAnsweredOnPage(1);

if (%%question1 == "no" && %%numberAnswered < 3)
{
    sgapiDisqualify("You have been disqualified");
}
```
