

sgapIn_Array(%%needle,%%haystack,%%strict)

Last Modified on 01/30/2015 4:31 pm EST

This is equivalent to the [in_array](#) function in PHP. It searches the array %%haystack for %%needle. Setting %%strict to TRUE will also check the type of the needle in the haystack.

To see an example or learn more other PHP functions and PHP programming, visit [PHP Documentation](#).
