

Radio Button Grid: Only Allow One Selection

Last Modified on 07/15/2016 4:59 pm EDT

[Radio Button Grid](#) questions allow a single selection per row. Sometimes, though you might want to allow a single select for the entire grid. While we don't have a built-in way to achieve this, you can set this up pretty easily with a little JavaScript.

	Robopal	Gizmobot	Botpro
IT Robot	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Household Robot	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Math Robot	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Check it out in an [example survey](#)!

OR

[Download this survey](#) to your account!

Setup

To set this up start by adding a [JavaScript Action](#) to the same page as your Radio Button Grid question and copy and paste the below JavaScript.

```
$radios = $('countme :radio');  
$radios.on('change', function() {  
    $radios.not(this).prop('checked', false);  
});
```

Then, just edit your Radio Button Grid, go to the **Layout** tab and enter countme into the **CSS Class**

Name field.

CSS Class Name:

countme

Finally, click **Save Question** and test it out!

Scripting and Other Out-of-the-Box Customizations

We're always happy to help you debug any documented script. That said, we do not have the resources to write scripts on demand.

If you have customization ideas that you haven't figured out how to tackle, we're happy to be a sounding board for SurveyGizmo features and functionality ideas that might meet your customization. Beyond this, you might want to consult with someone on our [Programming Services Team](#); these folks might have the scripting chops to help you to achieve what you are looking for!
